wheel has loverything to do with Perity under this same system, recommendations to size of frame train when the Nation's progress in train and development of industry and style of handle bar and leave the area univalled by any other halter rest to the buyer's faste. Liberal flower to human history thus far terms. Kindly sympathy, a physical recollection of halter days when these many wars when in Maine. of better days, when three men were shop in Maine. cooler headed and -more practical, may arrant the most gentle-reference to elr halluchations; but is there any letic and S and reason for putting the Nation into and see. a false position and stirring up all the anks to do all the mischief they can? The Government stands on a solld footing so long as it malutains, with the last Republican platform, on which President McKinley was elected, that the existing currency has been made and shall be kept "every dellar as good as gold," that "the existing gold standard endst be pre-served" and that "all our sliver and pap-

ber currency must be malutained at parity with gold," . This is an intelliint declaration which conforms to facts. It has been tremendopaly strengthened in weight with the People by the fact that the election of a Repubby the last that the election of a Repub-lican President and Congress without any change of currency have whatever that completely removed all monetary ap-prehension. Paules have vanished 112c bats of the night; heards of-gold have been unlocked; enterprise and capital have prepared for the atmost vigor after a tariff for protection and for revenue has been provided, and men in practical business are no longer fretting them-selves about a possibility, of impairment serves about a possibility, of impairment or debasement of the currency. This state of thiogs having been reached by the Republican declaration and pledge, followed by Republican victory, what occasion is there for a new declaration that the operancy is not spand and that the operancy is not spand and that that the currency is not sound and safe and that the system needs an claborate overbauling and robuilding?
The worst of it is that in one branch

The worst of it is that in one branch of Copuress, beyond a peradventure, those who advocate a revolutionary and destructive policy for free aliver, one ago have a clear majority. It is widen to all that the benithy, despelation dislocate which have resulted from Republican pladges and success have much imlican pledges and success have much im-proved the minds of some Senators, who are willing to pass a Republican tiell W.P. DICKEY & CO. bellef that a sufficient tariff for protect 44, 46 and 48 Broad 8t Bangor tion and for revenue will without further tion and for revenue will without further legislation; remove difficulties and anyleties about money. No one can tell how far these Scuatora may be for meaned by the practical results of the tariff about to be passed. But, if forced to vote or speak now in anticipation of all others results, there is no forced. all those results these Sensions can only relicrate their idea that free sliver coly relievate their idea that free silver colonge is the sale sanitolent; panaces, and thus commit; themselves, more to efforts which are dangerous to the public prosperity. Is it the right; time, to force the monetary question upon them, when nothing practical can be done but the only act or declaration mainly in the only lact or declaration possible in By Using ELECTRIC PANS. o Senate must be adverse to sound if

it does not altar the weight of these CC. 11c and Courier considerations that some leaders of high position fail to appreciate them. If they feel under obligation to press coon the country an untimely agitation which cannot possibly result in practical good at this session, there is so much the All business letters should be addressed to greater reason for Republicans in both houses to realize the harm, which such agltation would do to provide against it iro acrict it and bottle it up as far as possible. It is of no use to discuss theories about the monetary question when the two houses of Congress can by no possi-bility be brought to agree upon any de-shable measure. It would seem to be a good thus to prevent meedless discursion,. continued agitation and controversy, tween opposing lines. . . .

Modical Effects of Electricity

In a recent communication to the So-

cioto Internationale des Electriciens with these currents. A striking experiment consists of placing three lamps in tension, allowing the current to pass through the body. These currents cause The shoe factory and woolen mill at no sensations, and a man placed in a circuit down not feel that he is travered by the currents which brilliantly illuminate the lamps. The principal results of this electrification are an augmenta tion of the oxidations in the organism and an increase in the production of heat A subject who under ording conditions, eliminates 17 to 21 liters of carbonic acid per hour throws off 27 liters after having been submitted to this action. High frequency currents do not act solely upon the surface of the body, but also prefoundly upon the interior. All of these results have obtained upon a number of subjects by MM. Apostoli and Charrin.

M. d'Arsonvul cited, in closing, the action excelled upon microbes and buo-toria by these currents. The microbes and bacilli are modified, and the toxand bacilli are modified, and the texines are killed and transfermed to vaceine. MM. d'Arsonval and Charrin hope
by this method to arrive at a direct
treatment for the interior of the bodies
of patients suffering with zymotic discase, and experiments to this end bave been begun. - Electrical World. Two Gianta,

Cajanus, a Swedleh glant who was 9 feet high, was en exhibition in London in 1743, and several old-handbills still exist which set forth the measurements of this freak of mature. Thirty years later we have Charles Byrne, who was and the feet a free of the feet a free of the feet a free of the f at tho, age of 23, from hard drinking. Cetter O'Byrne, another Irish giant, followed a few years later. He was bern at Kinsale in 1761, and at the age of 15 was 8 feet high. This by the time he was 23 had increased to 9 feet 4 inches, and then he changed his name to O'Brian, in order to make people think that he was descended from King Brian Borothme, and went on exhibition. At that business he, of cohrse, soon realized a very confortable fortune and retired—dying at Clifton on Sont 8, 1804. His will especially provided that his body should be thrown into the sea in order to provent the surgeons from cutting it up. - London Standard,

Camphor For Itt. Wife. Camphor For Mt. Wife.

"There was a farmer up home," he said, "who used to have his occasional spree. Every one knew his failing, and nother of the druggists in town would sail him a drep. One day he brought a quart bottle into one of the apothecary shops, with two or three his lumping of shops, with two or three big lumps of gum camphor in the bottom. He taid the draggist that his wife wanted her camphor bottle filled with alcohol. The druggist filled it without suspecting anything. In a week the old man can again, and in a little while the third time. Finally the drugglet discovered
